What is this product?

Type

Investment Fund (F.C.P.), Luxembourg

Term

This sub-fund has no maturity date. However, the management company may decide to close the sub-fund under certain circumstances.

Objectives

The sub-fund aims to achieve capital gains by investing through active management of the portfolio. In order to achieve its objective, the sub-fund invests in global portfolio of equities, equity-related instruments, bonds and money market instruments or other UCITS and Undertakings of Collective Investments (UCIs), including Exchange Traded Funds (ETFs), with exposure to such asset classes. The sub-fund may invest up to 100% of its portfolio in instruments with exposure to equities when it is considered to be favourable. When conditions are deemed less favourable, the sub-fund may hold 100% of its assets in instruments with exposure to the interest rate market or from time to time and on a temporary basis only in cash deposits. The sub-fund can also use derivatives, such as over-the-counter transactions e.g. forwards and swaps and/or exchange traded transactions e.g. options and futures, to achieve the sub-fund's investment objective or to mitigate risks.

The sub-fund employs a top-down approach in order to determine the assets that are estimated to have favourable growth prospects. Under certain circumstances, when emerging markets show favourable growth prospects, the sub-fund may have an exposure up to 85% of its net assets in emerging markets and up to 65% of its net assets in emerging market equities. The sub-fund may not invest more than 35% of its net assets in a single emerging market country. The sub-fund takes sustainability risk and environmental, social and governance ("ESG") characteristics into account as part of its selection process. In that respect, the sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR (Sustainability Financial Disclosure Regulation). For the assessment, areas like corporate strategy, corporate governance, transparency and the product and service range of a company are considered. In addition to ESG criteria, other sustainability criteria are considered in the management of the sub-fund in accordance with (the goals set by) the Paris

Agreement. More information about the ESG characteristics applied is available upon request or online at the website of the Investment Manager: <https://www.ikc.se>.

Benchmark: The portfolio is actively managed on a discretionary basis without reference to a benchmark.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and of a suitable benchmark over the last 10 years. Markets

risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator: Emerging market risk, Liquidity risk, derivatives risk, counterparty risk

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

could develop very differently in the future.

This type of scenario occurred for an investment between 2012 and 2022, by referring to a benchmark between 2012 and 2012.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if FundRock Management Company S.A. is unable to pay out?

The Management Company is responsible for administration and management of the sub-fund, and does not typically hold assets of the sub-fund (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). The Management Company, as the manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the sub-fund or the depositary is unable to pay out. There is no compensation or guarantee scheme in place which may offset, all or any, of this loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario
- 100,000 SEK is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	6,000 SEK	16,975 SEK
Annual cost impact (*)	6.0 %	2.8 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.0% before costs and 3.2% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs
